PREPARED AT THE MO TO OREGON MEDICAL LABORATORY; By A. M. LORYEA & CO., East Portland Oregon.

LANGLEY & CO.,

Agents for British Columbia,

The Daily Standard. Tuesday, December 5, 1871.

Postponement of the Meeting of the Legislative Assembly. Our New Ministry remind us of Barnum, the Prince of Humbugs. It was Lake, where there are about thirty votes; a cardinal doctrine with Barcum that and there Mr. Wallace expects to have the people were gallible; and what was majority. more, that they were never in a better bumor than when they realized that they had been humbugged by a wooly horse, or mermald at an expense of a few quarters of dollars. Our New Ministry seem to this article has more than once been asked have formed a similar estimate of British Columbians,—and particularly of the members of the Legislative Assembly. Possibly the New Ministry is not altogether to blame, but it undoubtedly shares in the common displeasure at the course that the Executive has pursued respecting the meeting of the Legislature for the despatch of business. The McCreight - Good - Pearse Executive Council that surrounded Gov. Trutch subsequently to his inauguration, issued, after a series of delays that were totally indefensible, a proclamation notifying
the country of a general election; and in rule. And again I am asked, do colored which His Honor told the country that men want to e ve on Juries in this country the writs would be issued on October and at the risk of being accused of acting a was the essence of promise, the Government kept faith. But barring, if you please, the color of their there it ended in a bungle. It only skin; but if it is a sin to be black, some of us takes a week or ten days to reach Cariare desperately wicked; and, whose fault is that? Is it ours! No! for God made man boo or Kootensy, -- and say a week longer to reach Big Bend and Omineca, that would be the 16th or 20th of October, -yet returns of the elections were postponed till December 27th. Now a capable and vigorous Ministry would have had the elections over even in those remote districts by the 1st of November, and the returns lodged in the archives of the Government at Victoria before the lst of December. But our New Ministry has too much of the legal quibbler about it,—too many details to plead, is too much disposed to spin out a case for the personal benefit of the Ministry,—no matter how much inconvenience the spoils." In concluding this article, I solicit the earnest attention of the reader.

W. BOND.

The consequence is, the management of the general election cannot command a single defender except paid special pleaders to gloss over the short-comings of the Ministry. The The subject stares every one in the face. Why is it, ask the public, that the returns of the elections have not been made before the present time? The only tions; and at present the sole importers in answer that any one can give is that for this Province are T. N. Hinnes & Co. before the present time? The only answer that any one can give is that for some purpose or other not in the interest of the people at large, but to guil the community, the returns were put off till December, and then postponed till the middle of January. If any merchant had had to do business with Cariboo and Omiseca, Kootensy and Big Bend, and had such means to secure despatch as the Carabana and such means to secure despatch as the Carabana and such means to secure despatch as the Carabana and caps; also choice lace goods, waterproof costumes, &c. * Government possesses, even though guided by similar statutory provisions to those governing the election, yet his business with those districts would have been rich temple hung with glorious trophies, and completed ere this. In the queer old lined with tombs, but Fell's Coffee has but days of Kennedy, Seymour, Birch, and Musgrave, any amount of triffing with public opinion was patiently borne; but under a presumed people's government, there is no such word as toleration to be admitted. The country pays well; and it demands political workmen fit for the occasion,not mopes and dawdlers, -not men who have not the capacity to do the public business with ressonable despatch; but men who know how to set up the political machine and start it in working order within such reasonable time as practical business men transect their affairs. But our new Ministry,—the people,—the two-third re-elected Executive Council and their two-third extinct
predecessors,—have acted, to draw it
mildly, like beardless boys. No sane

Gentlemen's and Children's boots; they are
made of the very best English leathers; and
as their stock is much larger than they have
room for, they offer them cheap for cash.

FOR SALE BY choice of Gov. Trutch and not of the man who knows our mountainous country in the North and East, would have ever thought of adopting such pettifog-ging delays in the conduct of the election as have occurred. But whatever excuses may be made for election delays, even without the least bope of popular justifithe delay in summoning the Legislature to meet for the despatch of business. The country expected it to meet in December, —but in that they were disappointed. The two-third re-elected Executive Council summoned the members to meet on the 4th of January. But to every one's astonishment, after the summons had been sown broadcast over the land, a Government Gazette Extraordinary postpones the meeting till January 25th, -two months hence. Now what is such trifling for, except to humbug the country? to make fools of the members? to use them like battle-doors and shuttlecocks? to utilize them for the benefit of two or three gentlemen who never labored a day in the public service? The postponement is a piece and parcel of the art of the lawyer to turn a case to his special account, whilst the public have to submit to the inconvenience. It is not merely the members individually who Province of British Columbia and suffer from the delays; but the whole business of the country. Population was attracted here by Omineca by hundreds, and a portion of it might have been retained by a vigorous Ministry. But it must slide out, instead of inventing means to keep it here. The members, too, of the interior, instead of coming down before Fraser river closes, and returning as soon as it will open for steamboating, will have to come down on snow-shoes,

in canoes, over frozen and dangerous rapids, without roads except such as the

ludians have used ever since Adam was a

boy. Our farmer members, too, are to

brought here almost at the very

ent when they can commence farm-

The election for Vancouver District will take place to-morrow. Let the electors bear that fact in mind, and go each to the polls, and Mr. Wallace will be returned by an overwhelming majority. The only place, we are told, in which there will be any contest is in

Why is it that Colored men are not put on Juries in this Province.

EDITOR STANDARD,-As the caption of me; and I never have been able to answer it, and as the subject itself is full of tance, and worthy of consideration, I embrace the opportunity with your kind permission, to say a word thereupor. I have also been asked, why do colored men want to serve on juries? while somebody also says, it is just like a negro he wants to put himself forward into places where he is not wanted." But when we are permitted to look back for a moment upon the great human family, and see the great progress they have made, it produces proof of the strongest kind, that men are naturally ambitious, and seek to aggrandize themselves, by every honorable means in their power, colored men as well

They were issued, and so far as their mouth piece without their consent,

answer, yes!. Colored men are just like white men and men make the laws by which we are governed, I contend therefore that all goverments are inauguarated for the benefit of the governed, and governing classes govern by the consent of the people. There was a time these remarks would not apply, for it seemed the golden sun of Liberty, had set behind the Western horizon to rise no more; hope and ambition, the noblest instincts of our nature

A Protest From the Arctic.

It has of late years been the practice of whalemen upon entering the Arctic early in the season to capture walrus, in the absence of the whales, for oil, ivory and bides. During the past two or three years, great numbers of these animals have been captured for these purposes. Capt. Barker, of the Japan who passed the last winter with the natives, (who divided with him and his crew their scanty supplies,) states that they look upon the capture of the walrus by whalemen with great misgiving and regret. They said to him if the practice was continued long, the walrus upon which they depend for food, would become so scarce that they would be unable to procure food for the long winters, and they as well as those unfortunate mariners who, patch of Nov. 16th says :-- Advices from all like the crew of the Japan, are cast upon the Lake ports represent the storm as very their shores will have to starve. Between 1825 and 1831 be published some geological memoirs on the Highlands of Scotland, the Alps, and Germany. In 1831 he applied himself to a systematic examination of the older sedimentary deposits in England and Wales, succeeding, after seven years' labor, in establishing what he termed the Silurian system, comprehending a succession of strata previously unknown. This system, deriving its name from its occupying those counties which formed the ancient Kingdom of Silures, is divided into the Upper, consist-

Lower, of Caradoc and Llandilo rocks. Mr. Murchison traced the extension of the Silurian System and all the other Palæozoic rocks to Norway and Sweden, as also that of European Russia. Under the patronage of the Imperial Government Mr. Murchison, in 1840, and in company with M. de Verneuil and Count Keyserling, commenced the geological survey portions of Poland, Germany, and the Carpahians, as intermediate between the Russia and British deposits, When the first report of these investigations was made, in 1841, the Emperor, Nicholas I., presented Mr. Murchison with the second class of St. Anne, in diamonds, and also a colossal vase of Siberian avanturine, mounted on a column of porphyry Three years later, on the completion of his labours in Russia, the Emperor conferred upon him the Grand Cross of the Order of St. Stanislaus, appointing him a member of the Imperial Accademy of Sciences, In 1846, Mr. Murchison returned to England, when he was knighted for his distinguished services in the cause of science. During his life he published over 120 memoirs of the transactions of various scientific bodies, the most remarkable being his Alps, Apennines and Carpathians. In 1844 he published an exhaustive volume on Geological Structure of Russia. In this work he instituted a comparison between the rocks of Eastern Austria and those of the auriferous Ural Mountains, and predicted the of the Missouri Pacific railroad decided to discovery of gold in Australia. So impressed was he with the belief that crude gold existed in Australia, that he encouraged some Cornish miners to emigrate there and obtain

STANDARD:—Through the medium of yeur paper I want to state the very great good that has been done me by Dr. Ching Fun of this city, nxed door Kwong Lee & Co. For 24 years I suffered with neuralgia on the brain, which baffled the skull of three first-class. American physicians. Latterly bronchitis attacked my right lung, and my ey pearing of ever beingreued I placed myself as a last resort in the hands of Dr. Ching Fun, and after five months treatment I am a well man and feel that I cannot sound the eminent Chinese gentleman's praises too loudly, o that all my countrymen similarly affecteed may visit and find roliet, Respectfully,
